

Sheet width measurement

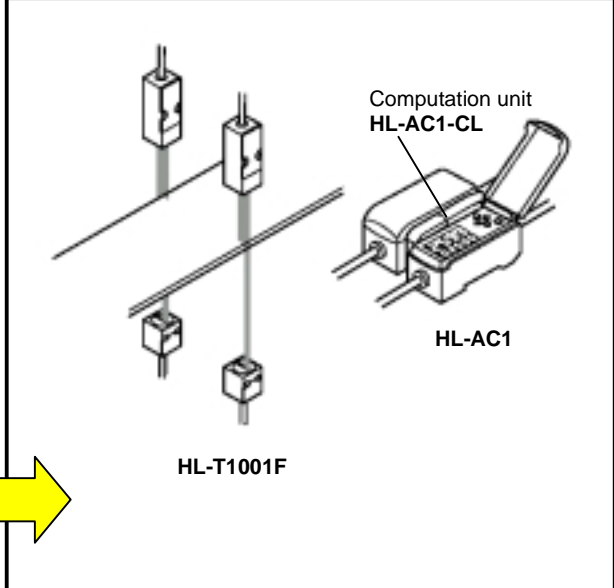

PREVIOUS METHOD

PROBLEM

For sheet width measurement, a digital panel controller was needed.

SOLUTION

MODEL

Ultra-compact laser line sensor

Sensor head : **HL-T1005F**

Controller : **HL-AC1**

Computation unit : **HL-AC1-CL**

BENEFIT 1

No need for a digital panel controller.

TIPS: By connecting a computation unit between two controllers, a calculation for the two sensors is carried out, which is displayed on the controllers. Thus, there is no need for a digital panel controller.

BENEFIT 2

Compliant with the FDA standard.

TIPS: HL-T1005F is compliant with the FDA standard.

BENEFIT 3
